Sustainability

“Sustainability is never achieved it is an ongoing endeavour to research, promote and improve”

How we are trying to reduce our carbon footprint and promote more sustainable practices within our business

LED Light replacement – All 258 Lightbulbs and fitting at our offices, kitchens and warehouses have now been replaced to LED in our continued effort to minimise power consumption and lower our carbon footprint

Off grid refrigeration - 68 solar panels on our kitchen roof provide all of our annual power consumption for our fridge's, freezers and office electricals and it keeps our water piping hot

Food waste - Compost, chickens or worms that's our split, great for the garden and really tasty eggs!

Recycling - You won't find cardboard boxes at your event, all our food is transported in re-useable food safe containers so packaging can be recycled prior to the event This year over 300kg of metal and 40 sacks of cardboard have been recycled

Waste oils – last year over 1000ltrs of our waste cooking oil was converted into bio diesel. That's enough to cover 6500 miles in one of our refrigerated vans. Now we are registered for waste transfer and we even collect from some of our customers when we are passing

Keep it local – by using local suppliers and produce we keep our food miles to a minimum. Smoked duck from the Bottisham smokery, speciality sausages from Mill Road butchers, great ales from Milton Brewery and Strawberries from Hackers farm are just a few of the products we use within our business

To date we've never come across East Anglian coffee or bananas, but you can be assured as many of the products we use from afar all carry the fair trade stamp

Peddle power not petrol power – apart from our delivery vehicles you won't find many of our staff asking for parking spaces just somewhere to lock the bike. (Look out for Phils retro chopper!)

On distance events we'll hire a minibus and travel as one team

Repair not replace – we've invested in some of the most reliable, energy efficient pieces of equipment on the market and have on-going maintenance programmes to keep them in tip top condition. When new equipment is sourced we look at some of the most energy efficient options available

Porcelain, Paper or Palm leaf? – All our buffets are presented on re-useable presentation dishes rather than the plastic disposable platters so often seen. We plan our delivery and collection rounds to keep the miles down or arrange for a collection on route to another event

For larger events we have a wide range of compostable products we can offer to serve your food from

Our aim for 2019

Replace one of our diesel delivery vehicles with a fully electric refrigerated vehicle
